

## 11. IMPACT BEDS:

Impact Bed structures as well as the high quality rubber impact pads are designed & manufactured in such a way so that it can withstand huge impact load falling on it. Impact pads are made after bonding UHMWPE & rubber which helps in taking extra load. The impact beds are customisable and thus can be manufactured both according to our own standard or as per customer drawing.

### FEATURES

- ✓ **Absorb Heavy Impact Load:** High quality rubber pads absorb heavy impact load.
- ✓ **Long Lasting:** Heavy duty steel frame and wear resistance UHMWPE layer on the rubber pad provides long life to the conveyor system.
- ✓ **Reduce Spillage:** Continuous support along the loading station reduces material spillage.
- ✓ **Lower Maintenance Cost:** Impact bar can be replaced individually.
- ✓ **Corrosion Protection:** The entire frame is powder-coated to provide corrosion free protection throughout the lifespan of the Impact bed structure.
